

BuddyQuiz and Jukebox

Stijn VAN ROMPAEY/ Michiel PELT – Alcatel

Application Area:

New multimedia experience that enables users to share and discuss multimedia content with friends in their community

Features:

- ❑ New innovative application concepts designed to increase the role of the user from a passive content consumer to an active TV participant
- ❑ Jukebox: users can create a common play list and share them within his community of friends. The community can listen in a synchronized way to the songs on their common play list and discuss the songs using text chat.
- ❑ BuddyQuiz: allows users to participate in an interactive TV quiz but only with his buddies (friends, family, ...) instead of with the whole population.
- ❑ Verify whether MHP is suitable to facilitate such upcoming applications
- ❑ Demonstrated on a PC running an MHP emulator
