

# Video over Wireless

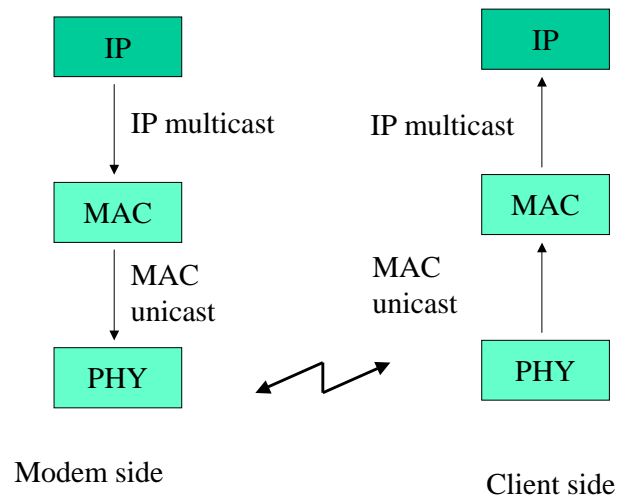

Yvon LEGALLAIS - Thomson R&D France ; Olivier MANDINE - Stepmind

**Application Area:**  
Multimedia streaming over wireless in a home environment

**Features:**

- Automatic Multicast to Unicast transformation
- Software solution implemented in the wireless modem

## Advantages of the method:

- Improvement of the robustness of the transmission thanks to an automatic repetition of lost packets
- Transparent for the stations
- Transparent for the applications
- Cost-effective, no specific hardware
